

DBMS LAB ASSIGNMENT-3

Name:K.V.S.BHARADWAJ

Rollno:19BCS047

1. Add, Modify and Delete Column using Alter Command

ADD:

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'Object Explorer' pane displays the database structure, including 'Movie_Details', 'Database Diagrams', 'Tables', 'System Tables', 'FileTables', 'External Tables', 'Graph Tables', 'dbo.Film', 'Columns', 'Keys', 'Constraints', 'Triggers', 'Indexes', 'Statistics', and 'dbo.Film_actor'. The 'Columns' list for 'dbo.Film' includes 'Film_id (PK, int, not null)', 'Title (varchar(45), not null)', 'Ratings (int, null)', and 'FilmName (varchar(20), null)'. The main pane shows the SQL query editor with the following commands:

```
use Movie_Details;
Alter table Film
Add FilmName varchar(20);
Alter table Film
Alter column FilmName varchar(20);
Alter table Film
Drop column FilmName;
```

The 'Messages' pane at the bottom indicates that the commands were completed successfully and provides the completion time: 2021-02-19T15:22:24.5559910+05:30.

MODIFY:

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'Object Explorer' pane displays the database structure, including 'Movie_Details', 'Database Diagrams', 'Tables', 'System Tables', 'FileTables', 'External Tables', 'Graph Tables', 'dbo.Film', 'Columns', 'Keys', 'Constraints', 'Triggers', 'Indexes', 'Statistics', and 'dbo.Film_actor'. The 'Columns' list for 'dbo.Film' includes 'Film_id (PK, int, not null)', 'Title (varchar(45), not null)', 'Ratings (int, null)', and 'FilmName (varchar(10), null)'. The main pane shows the SQL query editor with the following commands:

```
use Movie_Details;
Alter table Film
Add FilmName varchar(20);
Alter table Film
Alter column FilmName varchar(10);
Alter table Film
Drop column FilmName;
```

The 'Messages' pane at the bottom indicates that the commands were completed successfully and provides the completion time: 2021-02-19T15:24:34.2854050+05:30.

DELETE:

The screenshot displays the SQL Server Enterprise Manager interface. On the left, the Object Explorer shows the database structure for 'Movie_Details', including tables, columns, keys, constraints, triggers, indexes, and statistics. The 'dbo.Film' table is selected, and its columns are visible: 'Film_id (PK, int, not null)', 'Title (varchar(45), not null)', 'Ratings (int, null)', and 'FilmName (varchar(10), null)'. The main window shows a SQL query in the 'SQLQuery2....SRI (52))' tab. The query is as follows:

```
use Movie_Details;  
Alter table Film  
Add FilmName varchar(20);  
Alter table Film  
Alter column FilmName varchar(10);  
Alter table Film  
Drop column FilmName;
```

Below the query editor, the Messages pane shows the execution results:

```
Commands completed successfully.  
Completion time: 2021-02-19T15:25:41.3655538+05:30
```

2.) Insert 20 employees Data into all the tables.

SQLQuery2....SRI (52))*

```
insert into Inventory(Inventory_id,Inventory_name)
values(2,'Rocky');
insert into Inventory(Inventory_id,Inventory_name)
values(3,'Rosie');
insert into Inventory(Inventory_id,Inventory_name)
values(4,'Riyan');
insert into Inventory(Inventory_id,Inventory_name)
values(5,'Aryan');
insert into Inventory(Inventory_id,Inventory_name)
values(6,'Manvi');
insert into Inventory(Inventory_id,Inventory_name)
values(7,'Steve');
insert into Inventory(Inventory_id,Inventory_name)
values(8,'Elena');
insert into Inventory(Inventory_id,Inventory_name)
values(9,'Demon');
insert into Inventory(Inventory_id,Inventory_name)
values(10,'Vidhi');
insert into Inventory(Inventory_id,Inventory_name)
values(11,'Vansh');
insert into Inventory(Inventory_id,Inventory_name)
values(12,'Bhavya');
insert into Inventory(Inventory_id,Inventory_name)
values(13,'Ridhima');
insert into Inventory(Inventory_id,Inventory_name)
values(14,'Ponky');
insert into Inventory(Inventory_id,Inventory_name)
values(15,'Munny');
insert into Inventory(Inventory_id,Inventory_name)
values(16,'Koneru');
insert into Inventory(Inventory_id,Inventory_name)
values(17,'Apoorva');
insert into Inventory(Inventory_id,Inventory_name)
values(18,'Lipsika');
insert into Inventory(Inventory_id,Inventory_name)
values(19,'Vanshika');
insert into Inventory(Inventory_id,Inventory_name)
values(20,'Kidnesh');

select * from Inventory;
```

85 %

3.Show Violation of Primary Key, Unique, Not Null and default key constraints through insertion.

PRIMARY KEY

```
insert into Inventory(Inventory_id,Inventory_name)
values(1,'Reha');
```

5 %

Results Messages

Msg 2627, Level 14, State 1, Line 8
Violation of PRIMARY KEY constraint 'PK__Inventor__2B66F8034692F585'. Cannot insert duplicate key in object 'dbo.Inventory'. The duplicate key value is (4
The statement has been terminated.
Msg 2627, Level 14, State 1, Line 10

NOT NULL:

SQLQuery2....SRI (52))*

```
insert into Inventory(Inventory_id,Inventory_name)
values(20,'Kidnesh');

select * from Inventory;

insert into Inventory(Inventory_id,Inventory_name)
values( NULL,'Reha');
```

165 %

Results Messages

(20 rows affected)
Msg 515, Level 16, State 2, Line 45
Cannot insert the value NULL into column 'Inventory_id', table 'Movie_Details.dbo.In
The statement has been terminated.

Completion time: 2021-02-19T15:56:54.9964357+05:30

DEFAULT ERROR

```
SQLQuery2....SRI (52))*  ×
use Movie_Details;
alter table Inventory
add constraint df_Inventory_id
default '10' for Inventory_id
insert into Inventory(Inventory_id,Inventory_name)
values(21,'reha');
```

165 %

Messages

Msg 1781, Level 16, State 1, Line 2
Column already has a DEFAULT bound to it.
Msg 1750, Level 16, State 0, Line 2
Could not create constraint or index. See previous errors.

Completion time: 2021-02-19T16:12:03.6992878+05:30

4. Insert tuples into the table and see how foreign key constraint works if you try to insert into dependent table first.

```
SQLQuery2....SRI (52))*  ×
use Movie_Details;
insert into Film_actor
values(1,null,12);
```

165 %

Messages

Msg 547, Level 16, State 0, Line 2
The INSERT statement conflicted with the FOREIGN KEY constraint "FK_Film_acto_Film__267ABA7A". The conflict occurred in
The statement has been terminated.

Completion time: 2021-02-19T16:27:13.7226343+05:30

5. Show Violation of Foreign Key Constraint when you try to delete from a base table. If you get an error explain why deletion gives an error

The screenshot shows a SQL query window with the following text:

```
use Movie_Details;  
delete from Film_actor WHERE  
Film_id=12
```

Below the query window, the Messages pane displays the following error:

```
Msg 547, Level 16, State 0, Line 117  
The DELETE statement conflicted with the REFERENCE constraint "FK_TS_BookingDetails_TS_CustomerDetails". The conflict occurred in database "TS_Travel", table "dbo.TS_BookingDetails".  
The statement has been terminated.  
  
Completion time: 2021-02-18T20:23:12.8405276+05:30
```

The deletion is giving an error as it violates referential integrity constraint. First, we need to delete the corresponding tuple from the dependent table and then the base table.

6. Try to update a non-existing entity data and check for error

The screenshot shows a SQL query window with the following text:

```
use Movie_Details;  
update film_actor  
set actor_name = 'Koneru'  
where Film_id=12
```

Below the query window, the Messages pane displays the following error:

```
(0 rows affected)  
  
Completion time: 2021-02-18T20:27:21.7988264+05:30
```

7. Add a column which has default value.

```
SQLQuery2....SRI (52))* ×
use Movie_Details;
ALTER TABLE Film
ADD Title {varchar(45)}
CONSTRAINT {actor} DEFAULT "reha"
WITH VALUES
```

8. 5 Simple Select queries to retrieve data from your database.

9. Show how Foreign key constraint effects Updating a dependent table when value is not existing and in Base table where the value is referred and you want to update it.
